# Press Release

## **EPC's NEW ABSOLUTE IS A WORTHY ADDITION TO A DISTINGUISHED FAMILY**

*FOR IMMEDIATE RELEASE*

**SANDPOINT, IDAHO, January 7, 2002:** Leader in encoder innovation, Encoder Products Company (EPC) announces the latest addition to its popular Accu-Coder™ brand encoder line, the single turn Absolute Series Accu-Coder™ Model 926 Thru-Bore. Boasting a thin, 1.38" profile, a variety of bore sizes in both blind hollow and thru-bore versions, and EPC's innovative flexible mounting system, the Model 926 Absolute Series Encoder is in a class by itself. Its unique design makes it an ideal choice for a wide variety of industrial applications, and so versatile that the possibilities are endless. Due to its completely digital signal, the Model 926 is particularly well suited for applications where the presence of electrical noise is especially high. The Model 926 also features industrial grade, integral bearings, and shaft speeds up to 6000 RPM.

Like all Accu-Coder™ Brand Encoders, the Model 926, with its rugged pioneering design, is manufactured to EPC's exacting standards, and is backed by the best encoder warranty in the industry. As a result, you can be confident that your Accu-Coder™ will provide years of trouble free use.

For additional information contact EPC, PO Box 1548, Sandpoint, ID 83864, 800-366-5412, [www.encoderproducts.com](http://www.encoderproducts.com).
