# Press Release

## **EPC WELCOMES LATEST ADDITIONS TO THEIR ABSOLUTE ENCODER FAMILY**

*FOR IMMEDIATE RELEASE*

### **SANDPOINT, IDAHO, MARCH 8, 2002:**

Encoder Products Company (EPC), manufacturer of Accu-Coder™ brand encoders, announces the addition of two new encoders to their growing line of absolute encoders, the **Model 925** and **Model 958 Single Turn Absolute Encoders**.

The **Model 925**, housed in an industry standard size 25 (2.5") case, offers a variety of both flange and servo mounting styles. The **Model 958**, offered in an European standard size 58 (58 mm) housing, is an ideal alternative to the more costly European offerings. Each unit provides fully digital absolute positioning output, ideal for applications with an especially high presence of noise, or where absolute positioning information is needed even when power is lost and regained. The **Model 925** and **Model 958** both feature rugged, industrial grade housings and offer optional sealing up to IP66, making them an ideal choice for even your most environmentally demanding applications.

The **Model 925** and **Model 958 Single Turn Absolute Encoders** are manufactured to EPC's exacting standards to ensure the quality you've come to expect from the Accu-Coder™ brand. And with EPC's exclusive three-year warranty, you can be confident your Accu-Coder™ will provide years of trouble free use.

For additional information contact EPC, PO Box 1548, Sandpoint, ID 83864, 800-366-5412, [www.encoderproducts.com](http://www.encoderproducts.com).
