Press Release

EPC's ABSOLUTE ENCODER FAMILY –

LOWER PRICES MAKE THEM THE BEST VALUE IN THE MARKET TODAY

FOR IMMEDIATE RELEASE

SANDPOINT, IDAHO, January 17, 2003:

Encoder Products Company (EPC), manufacturer of Accu-Coder™ brand encoders, proudly announces new, lower prices for its entire family of absolute encoders, including the **Model 925 Single Turn**, the **Model 958 Single Turn**, and the **Model 926 Thru-Bore Absolute Encoders**. In fact, due to economies of scale and some improved manufacturing processes, EPC has succeeded in lowering single unit prices by as much as 20%!!

Boasting a thin, 1.38" profile, a variety of bore sizes in both blind hollow and thru-bore versions, and EPC's innovative flexible mounting system, the **Model 926** is in a class by itself. Its unique design makes it an ideal choice for a wide variety of industrial applications, and it is so versatile that the possibilities are endless. The **Model 925**, housed in an industry standard size 25 (2.5") case, offers both flange and servo mounting styles. The **Model 958**, in an European standard size 58 (58 mm) housing, is an ideal alternative to the more costly European offerings. All EPC Absolutes feature rugged, industrial grade housings and provide fully digital positioning output, ideal for applications with an especially high presence of electrical noise, or where absolute positioning information is needed even when power is lost and regained. The **Model 925** and **Model 958** also offer optional sealing up to IP66, making them an ideal for even your most environmentally demanding applications.

EPC's **Single Turn Absolute Encoders** are manufactured to EPC's exacting standards to ensure the quality you've come to expect from the Accu-Coder™ brand. And with EPC's exclusive three-year warranty, you can be confident your Accu-Coder™ will provide years of trouble free use.

For additional information contact EPC, PO Box 1548, Sandpoint, ID 83864, 800-366-5412, www.encoder.com.
