# Press Release

## **NEW HIGH RESOLUTION ENCODER USES INNOVATIVE ASIC TECHNOLOGY**

*FOR IMMEDIATE RELEASE*

**SANDPOINT, IDAHO, July 18, 2001:** Accu-Coder™ encoders from industry leader Encoder Products Company (EPC) now have resolutions five times greater than previously available. The new design, using EPC's unique sensing technology, provides resolutions of up to 30,000 CPR per channel (120,000 in full quadrature), and solves the annoying problems associated with other high-resolution designs. Historically, designers had to reduce the critical air gap between the sensor and the disk, compromising the performance of the encoder. EPC's innovative design keeps the air gap comfortably wide, protecting accuracy and reliability.

The new design, available in the versatile Model 755A and in the heavy-duty Model 725I, is manufactured to EPC's exacting standards. It has the best encoder warranty in the industry, ensuring you years of trouble free use while meeting your most demanding precision applications.

For additional information, contact EPC, PO Box 1548, Sandpoint, ID 83864, 800-366-5412, [www.encoderproducts.com](http://www.encoderproducts.com).
