# Press Release

## Extend Your Capabilities (50") With EPC's Versatile New Linear Cable Encoder

*FOR IMMEDIATE RELEASE*

Sagle ID, March 26, 2004: Flexibility, versatility, and maneuverability are the major benefits of Encoder Products Companies new **Linear Cable Encoder (LCE)**. Encoder Products Company, (EPC) manufacturers of the popular Accu-Coder™ brand line of encoders, has developed a solution for precise linear measurement in tough environmental conditions. Due to the retractable stainless steel cable, the **LCE** is much more flexible than typical rotary shaft encoders. This allows for measurement in different and unusual locations, often avoiding unsuitable environmental conditions. The heart of the **LCE** is the popular Cube series Accu-Coder™, which provides a reliable digital pulse train in either single channel or quadrature format. With optional IP65 rating, sealed bearings, a rugged housing, and the ability to accurately measure distances up to 50", the **LCE** is a necessity for many OEMs. With a wide range of resolutions available, **EPC's** unmatched 3-year warranty, and a *low* package price on the **LCE**, you can see how this versatile encoder can be suited to many different applications.

For additional information contact EPC, PO Box 249, Sagle, ID 83860, 800-366-5412, [www.encoder.com](http://www.encoder.com).
